Sustainability Indicators and Targets

For each of the six contribution areas, we have established long-term indicators to measure the degree of contribution to society (social impact indicators) and medium-term indicators to measure the growth of businesses that contribute to society (business activity indicators) under AG2023. We aim to achieve the goals for the Social Impact Indicators by taking actions in line with the Business Activity Indicators. The Business Activity Indicators have been set for focus areas selected in the process of materiality analysis. The officer-level persons in charge of each business incorporate activities to achieve the goals into the members of the organization within the Group. Through the PDCA cycle for these indicators, we will accelerate contribution and growth.
