Message from Chairman and President & CEO

To Our Shareholders and Investors

We wish to take this opportunity to express our heartfelt gratitude for your ongoing support. Since its founding in 1915, Yokogawa has contributed to society by providing industry with cutting-edge products and solutions based on its core competencies in measurement, control, and information technologies. Our business environment has changed drastically from one era to the next. Most recently, a wave of digital transformation driven by technologies such as artificial intelligence and big data has swept across the industrial and business landscape, driving interest in the adoption of new digital technologies that will improve productivity. Our products and solutions based on its core competences in measurement, control, and information technologies.

Keeping in mind the relationship between our business activities and issues that concern all members of our society, in fiscal year 2017 we articulated a vision for the year 2050 and set specific sustainability goals (the “Three goals”) to make the world a better place for future generations. We have set quantitative targets for 2020, and are promoting initiatives that are consistent with the key performance indicators (KPI) for 2020, and are promoting initiatives that are consistent with the Sustainable Development Goals (SDGs).

To make this happen we will need technologies, skilled personnel, and financial resources. And to guide us in our efforts to realize our ideals, specific objectives set out in our Transformation 2020 (TF2020) mid-term business plan. Updated in 2018, our long-term business framework sets out what kind of company Yokogawa will strive to become, looking 10 years and even further into the future.

Takashi Nishijima
Chairman
