# Risks Relating to the Group's Business

Described below are the risks surrounding the Group that are believed to significantly affect investors' decision-making.

While the Group will make every effort to establish risk management systems and risk management process to mitigate and avoid risks, should any of these risks materialize they could impact the Group's business performance and our financial status.

The matters described below are based on judgments made by the Group at the end of current consolidated fiscal year, and may vary from the actual results.

### (1) Risks relating to the external environment

### (Related to social conditions)

The scope of the Group's activities extends not just to Japan but also to various parts of the world. Changes in the external environment including political, economic or social conditions in each region could have an impact on factors including customer needs, various costs, the safety of expatriate workers and employees on business travel, and the supply chain, etc. Specifically, the following risks have been identified.

- Policy factors such as regulations, taxation, industrial policies and commerce policies
- Economic factors such as business conditions, inflation and unemployment rates
- Social factors including crime, abduction, terrorism, rioting, and labor strikes
- Geopolitical factors such as war, regional conflicts, disputes among major countries and economic sanctions

To address these risks, the Company strives to collect information on a regular basis through its headquarters, business divisions and affiliates, etc., as well as by utilizing specialist external organizations. The Company also works to keep up to date with evolving customer needs due to the changing external environment, enhancing its solutions to ensure delivery of prompt and accurate customer support.

### (Related to fluctuations in financial markets)

The Group operates globally and uses many currencies in its business activities. Rapid or sharp swings in foreign exchange markets could have various effects such as reducing product competitiveness or increasing procurement costs. The Group enters into forward exchange contracts in order to respond to fluctuations in foreign exchange rates.

Changes in interest rates related to the Group's assets and liabilities may impact increase or decrease in interest payments and the value of assets, etc.

Additionally, if prices of the shares and other securities held by the Group fall, there could be an impact on business results due to the recognition of valuation losses, as well as an impact on the Group's financial situation due to reduced capital efficiency. Regarding cross-shareholdings, the Board of Directors decides every year if it is suitable to hold the shares by examining the purpose and economic rationale, etc. of individual shares from a medium- to long-term perspective. The Group's policy is to hold the minimum necessary amount of such shares while working to reduce them.

### (2) Risks relating to strategy

(Related to markets/competitive environment)

### 1) Cost competitiveness

As the Company aggressively develops its businesses, competition in construction and modernization projects is intensifying, and demand for cost reduction is intensifying. At the same time, resource-rich and emerging countries are increasingly prioritizing their own countries, and there is increasing demand for the localization of employment, services and procurement, including product production. Although the Company is working to increase its cost competitiveness, there is the risk that the Company will miss out on

business opportunities if it cannot effectively respond to the demand in these markets that costs be reduced, including product and service costs and selling, general and administrative expenses.

### 2) Establishment of competitive advantages by the use of digital technologies

There is growing demand for a dramatic increase of productivity in business processes throughout the value chain and product life cycle through the utilization of digital technologies. The Company must respond to this demand as a business and establish a competitive advantage. Recognizing this as an opportunity for business growth, the Group is working to create new value through digital transformation in a wide range of fields, not only for itself but also for its customers. If the Company is unable to keep up with new technology or meet the demands of these markets, this could lead to the loss of business opportunities.

### 3) Transformation of business model to match market needs

While changes in society and technological innovations are creating many new business models, the Group's customers are also increasingly demanding subscription businesses and other businesses that reduce initial deployment costs and provide flexibility in operations and maintenance after deployment. The Group is also transforming its business model by working to establish performance-based compensation businesses and service-providing businesses. There is a risk that business opportunities will be lost if the Group is unable to adequately respond to the new market needs that are changing towards the future, or if it delays its efforts.

### 4) Changes in the market environment due to climate change initiatives

Society's heightened demand for action regarding climate change initiatives is affecting the strategies of the Group's customers. The Group recognizes that energy-related companies, which are among the Group's major customers, are studying measures to address environmental change, such as a shift of energy resources from a long-term perspective. The Group views these changes as business opportunities and is working to respond to changes in the market environment. However, if the Group is unable to respond to these changes in the customers' environments or if its efforts are delayed, there is the risk that business opportunities could be lost.

### (Related to strategic investment)

The Group is focusing on strengthening its strategic growth investments to advance into new businesses and fields, while also pursuing M&A activities and alliances to acquire technologies, sales channels, products and services, customers, human resources, and expertise. However, it may not be possible to swiftly launch new businesses due to unexpected environmental changes or difficulty fully utilizing the acquired assets or opportunities. In addition, there is a risk that integration failures in terms of the management, operations or awareness of an acquired company could prevent the Company from achieving the intended results.

To address these risks, the Company have formulated guidelines to ensure the efficient implementation of activities from the discovery of a potential acquisition to its post-investment integration, and ensure the guidelines are disseminated among stakeholders. Moreover, the Company is working to strengthen its project implementation framework in order to carry out the entire process from project discovery to investment, to improve the accuracy of evaluation and verification, and to swiftly launch businesses after investment. The Company is also working to secure, train and utilize the specialized human resources that support it.

### (Related to R&D)

The Group regards basic research into measurement, control and information, and the development of advanced technologies and digital technologies such as the IoT and AI as its most important management

issues, and is continuously promoting the development of new technologies with a view toward the future. In addition, in response to changing international standards, efforts to realize a sustainable society such as the SDGs are being strengthened. However, there is the risk that R&D investments will not meet future market demands and targets as planned, leading to lost business opportunities.

The Company also continues to invest in R&D for product technology and service innovation to maintain its competitiveness. However, there is the risk that the Company's R&D investments will not succeed if it fails to understand market trends regarding products and services with growth potential. In addition, there is the risk that R&D investments do not produce innovative technologies or produce the results that were expected even if they fit the market, or competitors may precede the Group in the development of the technology.

### (Related to the recruitment and training of human resources)

The Group's growth is supported by its capable personnel, such as the human resources who support its leading-edge technologies and the engineers who ensure high product quality. In particular, the importance of human resources capable of proposing solutions, human resources with engineering and project-management abilities, and human resources with skills and knowledge related to AI, digital technologies, and the company's new businesses is increasing. However, there is the risk that we may not be able to secure and train the necessary human resources as planned. If so, the Group's ability to conduct effective business operations or execute strategies may be affected.

We are working to mitigate these risks by providing employees with growth opportunities and developing an environment that makes it easy for them to succeed. Additionally, we are unifying our personnel systems and processes globally, and advancing the utilization of personnel IT systems to ensure they operate effectively. The Group has defined a human resource portfolio that aligns with its business strategies, and is working to globally optimize its human resources by securing and developing the human resources needed for each business strategy.

### (Related to human rights)

If a human rights issue such as harassment, discrimination or poor working environment arose within the Group, it could have wide-ranging effects, including the physical and mental wellbeing of victims, legal action, the cessation of business and damage to the Group's corporate image.

To address this, the Group has established the YOKOGAWA Group Human Rights Policy. The Group's established policy is to respect human rights, and it has expressed its support for the U.N. Global Compact. Consequently, the Group is stepping up its efforts based on the human rights policy and international human rights standards set forth in the Compact. Regarding human rights initiatives in the supply chain, the Group has provided guidelines prohibiting forced labor, inhumane treatment, child labor and discrimination, and protecting appropriate wages, compliance with laws regarding work hours, and the right to organize. The Group works to identify, prevent or mitigate risks that could have a negative impact on human rights, including in its business activities and the supply chain, and advances human rights due diligence to fulfill its accountability in explaining how it addresses such issues. In addition, as a means to prevent human rights violations before they occur, we have established a point of contact for consultation and reporting to all people working in the Group, putting in place a framework that seeks solutions in response to reports of human rights issues.

### (Related to depreciation of owned assets)

There is the risk that the value of the Group's business assets may decline due to decreased market prices or reduced profitability. If so, the Group's business results and financial situation could be affected, including the occurrence of impairment losses.

### (3) Risks relating to operations

### (Related to compliance)

While the Group needs to conduct business activities in compliance with various laws, regulations and social norms, there is a risk that legal violations or misconduct causing a social uproar could lead to administrative penalties, lawsuits, or a decline in corporate image.

The Group has established the YOKOGAWA Group Code of Conduct as its basic principles on compliance. We have also established the YOKOGAWA Group Compliance Guidelines and Anti-Bribery and Corruption Regulations which lay out compliance requirements for issues encountered in day-to-day operations. The Group has also established and continues to operate a point of contact for internal reporting and consultation for compliance issues. We provide compliance-related education to employees, and strongly encourage compliance-focused management based on the compliance-first declaration made by the President & CEO, Representative Executive Officer.

### (Related to product quality)

The Group provides highly reliable products and services to customers through its accumulation of technology and expertise over many years and the development of a strict quality control system. However, there is the risk that defects in the Group's products and services may exist, and could cause damage to customers as a result. This could affect the Group's overall business activities, adversely impact its corporate image, and result in the loss of key customers.

The Group embraces the fundamental spirit of "quality first" and advances initiatives that place top priority on customer satisfaction. We operate a quality management system that complies with international standards, and thoroughly enforce quality control across all processes, from development and design to manufacturing, sales and service. Our employees work with a quality-first mindset and engage in initiatives aimed at ongoing quality improvements based on the Group's common rules and approaches.

### (Related to procurement and supply)

There is a risk that the supply of products could be delayed or suspended if it becomes difficult to procure items such as electrical components or manufacture key products due to supply chain disruptions caused by large-scale natural disasters, war or regional conflicts, the inability to procure mineral resources, or key suppliers suspending operations. This could lead to breaches of contractual terms with customers and the suspension of transactions.

To address risks related to the procurement of components and other items, the Group works to establish stable procurement by collecting information on market trends such as key electrical components on a regular basis, while also thoroughly managing supplier quality and delivery deadlines and diversifying its supplier network to avoid excessive concentration or dependence on specific suppliers.

### (Related to project management)

In the Group's business, particularly in project-type businesses that provide customers with the products, engineering solution services, and products of other companies in bulk, the reliable execution of project management is a necessity. We are striving to prevent the occurrence of unprofitable projects through such efforts as profit estimation in the process leading up to the receipt of orders, the improvement of the accuracy of profitability management until delivery, and the thorough control of production and quality. However, there is the risk that we may incur unexpected costs or may be liable for compensation due to delayed delivery if there are deviations from the assumed estimates, or problems in the management of profit, production, quality, etc.

### (Related to intellectual property rights)

The Group has established a complete management system to protect its intellectual property rights and prevent infringing upon the rights of other companies in the course of its development of proprietary products and services. However, there is a risk that the Group will be unable to earn expected profits if intellectual property rights are infringed upon by a third party. There is also a risk that the Group will be disadvantaged by the inability to use key technologies and liable for compensation if the Group is deemed to have infringed upon the intellectual property rights of another company due to a difference in viewpoint or some other reason.

The Group manages these issues based on an intellectual property portfolio. We pursue effective and efficient risk assessments and intellectual property acquisition through the creation and rights protection of inventions and intellectual property due diligence in M&A activities and investment. To strengthen intellectual property activities based on this portfolio, the Group has introduced an intellectual property management system and coordinates with internal and external resources such as patent offices. We also conduct employee training to encourage higher sensitivity to patent risks and prevent infringing upon the patents of other parties.

### (Related to information security)

Through its business activities, the Group acquires personal or otherwise confidential information about its customers and trading partners. However, there is a risk that the information could be leaked or abused due to a cyberattack on the Group or misconduct on the part of an employee, etc. Those risks could leave the Group liable for compensation, lead to the suspension of transactions, and adversely affect its corporate image.

The Group has established an information security promotion framework and advances information security measures. We conduct information security activities based on the approaches laid out in the ISO 27001 standard, assess the implementation status of related measures and their operation, and work to make the necessary improvements. We have also established an Information Security Committee chaired by the director in charge of information security and composed of cyber security personnel from each field, including product-related fields. We also work to share information within the Group and monitor the latest trends to enhance our ability to respond to cyber-attacks.

### (Related to natural disasters)

There is a risk that the Group could suspend operations if its property or human resources sustained severe damage due to a natural disaster, including wind and flood damage intensified by climate change, a major earthquake, or a large-scale volcanic eruption. If key functions or operations of the Group were shut down and their restoration was delayed, it could impact the Group's business results.

The Company responds to crises that significantly impact management through a Crisis Management Committee chaired by the President & CEO, Representative Executive Officer. We have established the initial response to be undertaken immediately following a natural disaster as guidelines, and clarified the action expected to employees and organizations. The Company has also established a business continuity plan (BCP) and formulated measures to restore or replace key operations and functions. BCP training is periodically conducted to improve the effectiveness and practicality of the formulated BCP, with any identified issues utilized in ongoing BCP improvement activities.

### (Related to nature and biodiversity)

The Group's business activities both depend on the blessings of nature and impact it to a certain degree. Across the Group's value chain, there is a risk of impacting nature and ecosystems due to land alterations from resource mining in the procurement process, climate change such as warming and drought associated with greenhouse gas emissions in the use process, and water pollution in the disposal process.

The Group has set out efforts to address biodiversity challenges in its Group Environmental Policy and conducts conservation activities in cooperation with local governments, NPOs and other organizations. The Group also supports the recommendations of the Taskforce on Nature-related Financial Disclosures (TNFD) and has declared its intent to make disclosures based on the TNFD recommendations. We are analyzing the dependencies, impacts, risks and opportunities in our operations in line with the approach developed by the TNFD, and are in the process of reviewing measures to mitigate the adverse effects on nature and associated risks.

### 2025 Yokogawa Repor

# **Notes to Consolidated Financial Statements**

Yokogawa Electric Corporation and Consolidated Subsidiaries Year Ended March 31, 2025

### 1. Basis of Presentation of the Consolidated Financial Statements

The accompanying consolidated financial statements have been prepared in accordance with the provisions set forth in the Japanese Financial Instruments and Exchange Act and its related accounting regulations and in accordance with accounting principles generally accepted in Japan ("Japanese GAAP"), which are different in certain respects as to the application and disclosure requirements of International Financial Reporting Standards ("IFRS").

In preparing these consolidated financial statements, certain reclassifications and rearrangements have been made to the consolidated financial statements issued in Japan in order to present them in a form which is more familiar to readers outside Japan. In addition, certain reclassifications have been made in the 2024 consolidated financial statements to conform to the classifications used in 2025.

The consolidated financial statements are stated in Japanese yen, the currency of the country in which Yokogawa Electric Corporation (the "Company") is incorporated and operates. The translations of Japanese yen amounts into U.S. dollar amounts are included solely for the convenience of readers outside Japan and have been made at the rate of ¥149.52 to \$1, the approximate rate of exchange at March 31, 2025. Such translations should not be construed as representations that the Japanese yen amounts could be converted into U.S. dollars at that or any other rate.

Japanese yen figures less than a million yen and U.S. dollar figures less than a thousand dollars are rounded down to the nearest million yen and thousand dollars, except for per share data. As a result, totals in millions of yen and thousands of U.S. dollars may not add up exactly.

### 2. Summary of Significant Accounting Policies

• a. Consolidation — The consolidated financial statements as of March 31, 2025 include the accounts of the Company and its 124 (122 in 2024) significant subsidiaries (together, the "Group"). Changes include i) purchases of Adept Fluidyne Pvt. Ltd., BaxEnergy GmbH, BaxEnergy Italia S.r.l., Flaretot Limited and Sapphire Consultants Limited; ii) liquidation of Soteica Ideas & Technology LLC, Yokogawa Insilico Biotechnology PTE. LTD. and Yokogawa Insilico Biotechnology Corporation.

Under the control and influence concepts, those companies in which the Company, directly or indirectly, is able to exercise control over operations are fully consolidated, and those companies over which the Group has the ability to exercise significant influence are accounted for by the equity method.

Investments in one (one in 2024) unconsolidated subsidiary and three (three in 2024) affiliated companies are accounted for by the equity method.

The excess of the cost of acquisition over the fair value of the net assets of the acquired subsidiary at the date of acquisition is being amortized on a straight-line basis over a period of up to 20 years. However, any insignificant amount of goodwill is amortized in full upon its recognition.

All significant intercompany balances and transactions have been eliminated in consolidation. All material unrealized profit included in assets resulting from transactions within the Group is also eliminated.

### b. Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated

Financial Statements — Under Accounting Standards Board of Japan (ASBJ) Practical Issues Task Force (PITF) No. 18, "Practical Solution on Unification of Accounting Policies Applied to Foreign Subsidiaries for the Consolidated Financial Statements," the accounting policies and procedures applied to a parent company and its subsidiaries for similar transactions and events under similar circumstances should in principle be unified for the preparation of the consolidated financial statements. However, financial statements prepared by foreign subsidiaries in accordance with either International Financial Reporting Standards or accounting principles generally accepted in the United States of America (Financial Accounting Standards Board Accounting Standards Codification—FASB ASC) tentatively may be used for the consolidation process, except for the following items which should be adjusted in the consolidation process so that net income is accounted for in accordance with Japanese GAAP unless they are not material: (1) amortization of goodwill; (2) scheduled amortization of actuarial gain or loss of pensions that has been directly recorded in equity through other comprehensive income; (3) expensing capitalized development costs of research and development; (4) cancellation of the fair value model of accounting for property, plant, and equipment and investment properties and incorporation of the cost model of accounting; and (5) recording a gain or loss through profit or loss on the sale of an investment in an equity instrument for the difference between the acquisition cost and selling price, and recording impairment loss through profit or loss for other-than-temporary declines in the fair value of an investment in an equity instrument, where a foreign subsidiary elects to present in other comprehensive income subsequent changes in the fair value of an investment in an equity instrument.

Business Strategie

- c. Business Combinations Business combinations are accounted for using the purchase method. Acquisition-related costs, such as advisory fees or professional fees are accounted for as expenses in the periods in which the costs are incurred. If the initial accounting for a business combination is incomplete by the end of the reporting period in which the business combination occurs, an acquirer shall report in its financial statements provisional amounts for the items for which the accounting is incomplete. During the measurement period, which shall not exceed one year from the acquisition, the acquirer shall retrospectively adjust the provisional amounts recognized at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and that would have affected the measurement of the amounts recognized as of that date. Such adjustments shall be recognized as if the accounting for the business combination had been completed at the acquisition date. The acquirer recognizes any bargain purchase gain in profit or loss immediately on the acquisition date after reassessing and confirming that all of the assets acquired and all of the liabilities assumed have been identified after a review of the procedures used in the purchase price allocation. A parent's ownership interest in a subsidiary might change if the parent purchases or sells ownership interests in its subsidiary. The carrying amount of noncontrolling interest is adjusted to reflect the change in the parent's ownership interest in its subsidiary while the parent retains its controlling interest in its subsidiary. Any difference between the fair value of the consideration received or paid and the amount by which the noncontrolling interest is adjusted is accounted for as capital surplus as long as the parent retains control over its subsidiary.
- **d. Cash Equivalents** Cash equivalents are short-term investments that are readily convertible into cash and exposed to insignificant risk of changes in value. Specifically, cash equivalents represent time deposits that mature within three months of the date of placement.
- e. Inventories Inventories are stated at the lower of cost or the net selling value. Cost is mainly determined by the specific identification method for finished goods and work in process, and by the average method for merchandise, raw materials, and supplies.
- f. Investment Securities Investment securities comprised available-for-sale securities. Except for equity securities without market price, available-for-sale securities are reported at fair value, with unrealized gains and losses, net of applicable taxes, reported under accumulated other comprehensive income in a separate component of equity. Costs of securities sold are calculated primarily by the moving-average method.

Equity securities without market price are stated at cost determined by the moving-average method. For other-than-temporary declines in fair value, investment securities are reduced to net realizable value by a charge to income.

• g. Property, Plant, and Equipment — Property, plant, and equipment are stated at cost, less accumulated depreciation and any impairment loss. Depreciation of property, plant, and equipment is mainly calculated by the straight-line method over their estimated useful lives.

The estimated useful lives range principally from three to 50 years for buildings, and from four to 10 years for machinery and equipment. The estimated useful lives for leased assets are the terms of the respective leases.

- h. Intangible Assets Intangible assets consist mainly of software, technology assets, customer-related intangible assets, and goodwill. Amortization of intangible assets is mainly calculated by the straight-line method over their estimated useful lives. Software for internal use is amortized using the straight-line method over the estimated useful life of principally five years. Customer-related intangible assets are amortized using the straight-line method over periods of future revenue to be generated (mainly 10 years).
- i. Leases Finance lease transactions are capitalized by recognizing lease assets and lease obligations in the consolidated balance sheet.

Depreciation of leased assets is calculated by the straight-line method over their lease periods. The residual value of leased assets with residual value guarantee clause is the guaranteed amount and zero for leased assets without such clause.

Depreciation of right-of-use assets is calculated by the straight-line method over shorter of their lease periods or their estimated useful lives.

• j. Long-lived Assets — The Group reviews its long-lived assets for impairment whenever events or changes in circumstance indicate the carrying amount of an asset or asset group may not be recoverable. An impairment loss is recognized if the carrying amount of an asset or asset group exceeds the sum of the undiscounted future cash flows expected to result from the continued use and eventual disposition of the asset or asset group. The impairment loss is measured as the amount by which the carrying amount of the asset exceeds its recoverable amount, which is the higher of the discounted cash flows from the continued use and eventual disposition of the asset or the net selling price at disposition.

- **k.** Allowance for Doubtful Accounts The allowance for doubtful accounts is stated in amounts considered to be appropriate based on the Group's past credit loss experience and an evaluation of potential losses in the receivables outstanding.
- **I. Provision for Contract Loss** When it is probable that the total construction costs will exceed total construction revenue, an estimated loss on the contract should be immediately recognized by providing for a loss on such construction contracts.
- m. Retirement and Pension Plans The Company and most of its consolidated subsidiaries have defined contribution plans, and some other consolidated subsidiaries have defined benefit plans for employees. Certain overseas subsidiaries account for their pension plans in conformity with IFRS.

The main method used to attribute expected benefits to each period is the benefit formula basis.

Actuarial gains or losses are amortized on a straight-line basis over a period within the average remaining years of service of the employees from the following year in which they arise.

Prior service cost is amortized on a straight-line basis over a period within the average remaining years of service.

- n. Research and Development Costs Research and development costs are charged to income as incurred.
- **o. Bonuses to Directors** Bonuses to directors are accrued at the end of the year to which such bonuses are attributable.
- p. Revenue Recognition The Group applied ASBJ Statement No. 29, "Accounting Standard for Revenue Recognition" and ASBJ Guidance No. 30, "Implementation Guidance on Accounting Standard for Revenue Recognition" from the beginning of the year ended March 31, 2021, as they become effective for the annual periods beginning on or after April 1, 2018. As a result, the Group recognizes revenue at the time of the transfer of promised goods or services to customers in an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services based on the following five steps.

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation

Regarding Step 4 above, the Group utilizes cost plus a margin approach in determining stand-alone selling prices and allocates transaction prices to performance obligations.

### (1) Sales of Products

With regard to sales of products, such as field instruments and others which are placed at production sites, performance obligations are determined based on each product, and contract prices are used as a basis for transaction prices if one contract contains multiple products. Revenues are recognized at the time of delivery as the customers obtain control of the assets at the time of delivery and performance obligations are deemed to be satisfied at the same time. Revenues are recognized at the time of shipment if contracts satisfy requirements of Paragraph 98 of the guidance. Considerations for performance obligations are received approximately within one year after the performance obligations are satisfied.

### (2) Construction Contracts

Transactions in the forms of construction contracts, including engineering, involve the creation of assets, which cannot be directed to another customer or assets with no alternative use and accompany rights to payments for the completed work. Percentage of progress regarding satisfaction of performance obligations for construction contracts is estimated and revenues are recognized based on the estimated percentage over certain period of time. The percentage of progress is determined based on a ratio of actual costs incurred against the estimated total costs to satisfy the performance obligation. Net sales recorded using this method were ¥260,397 million (U.S.\$1,741,554 thousand) and ¥240,375 million for the years ended March 31, 2025 and 2024, respectively. If order amounts or total construction costs to satisfy the performance obligation cannot be reliably estimated, a portion of actual costs incurred of which collection is probable is recognized as revenue. Considerations for performance obligations are generally received as the performance obligations are satisfied in accordance with contract milestones. Transactions arising from maintenance services are recognized over the contract periods.

• q. Income Taxes — The provision for income taxes is computed based on the pretax income included in the consolidated statement of income. The asset and liability approach is used to recognize deferred tax assets and liabilities for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Deferred taxes are measured by applying currently enacted income tax rates to the temporary differences.

The Company and certain domestic subsidiaries file their tax returns under the group tax sharing system, which allows these companies to base tax payments on the combined profits or losses of the parent company and its wholly owned subsidiaries in Japan.

- r. Foreign Currency Transactions Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated into Japanese yen at the exchange rate as of that date. The foreign exchange gains and losses from translation are recognized in the consolidated statement of income.
- s. Foreign Currency Financial Statements The balance sheet accounts of the consolidated foreign subsidiaries are translated into Japanese yen at the prevailing exchange rate as of the balance sheet date except for equity, which is translated at the historical rate. Differences arising from such translation are shown as "Foreign currency translation adjustments" under accumulated other comprehensive income and noncontrolling interests in a separate component of equity. Revenue and expense accounts of consolidated foreign subsidiaries are translated into yen at the average exchange rate.
- t. Fair Value Measurement From the beginning of the year ended March 31, 2022, the Group adopted ASBJ Statement No. 30, "Accounting Standard for Fair Value Measurement," issued on July 4, 2019, and other related standards and guidance. The new accounting policies as stipulated in these standards and guidance are applied prospectively in accordance with the transitional treatment as stipulated in Paragraph 19 of the "Accounting Standard for Fair Value Measurement" and Paragraph 44-2 of the ASBJ Statement No. 10, "Accounting Standard for Financial Instruments," issued on July 4, 2019. The effects of applying these standards and guidance on consolidated financial statements were immaterial.

From the beginning of the year ended March 31, 2023, the Group adopted ASBJ Guidance No. 31, "Implementation Guidance on Accounting Standard for Fair Value Measurement," revised on June 17, 2021. The new accounting policies applied prospectively in accordance with the transitional treatment as stipulated in Paragraph 27-2 of the "Implementation Guidance on Accounting Standard for Fair Value Measurement." The effects of applying this guidance on consolidated financial statements were immaterial.

• u. Derivatives and Hedging Activities — The Company and certain consolidated subsidiaries use a variety of derivative financial instruments, including foreign currency forward contracts, currency options, and interest rate swaps, as a means of hedging foreign currency and interest rate risks. The Group does not enter into derivatives for trading or speculative purposes.

Derivative financial instruments and foreign currency transactions are classified and accounted for as follows: a) all derivatives other than those which qualify for hedge accounting are measured at fair value, and gains or losses are recognized in the consolidated statement of income; and b) for derivatives used for hedging purposes, if the derivatives qualify for hedge accounting because of high correlation between the hedging instruments and the hedged items, gains or losses are deferred until maturity of the hedged transactions. These amounts are shown as "deferred gain on derivative under hedge accounting" under accumulated other comprehensive income in a separate component of equity.

Foreign currency forward contracts are utilized to hedge the foreign currency risk of trade receivables denominated in foreign currencies. If the forward contracts qualify for hedge accounting, these trade receivables are translated at the contracted rates. Interest rate swaps are utilized to hedge the interest rate risk of long-term debt. Those interest rate swaps that qualify for hedge accounting and meet specific matching criteria are not remeasured at market value, but the differential paid or received under the swap agreements is recognized and included in interest expense or income.

If the hedging relationships qualify for the application of ASBJ PITF No. 40 "Practical Solution on the Treatment of Hedge Accounting for Financial Instruments that Reference LIBOR," the special treatment as prescribed in the PITF No. 40 is applied to those hedging relationships. The hedging relationships to which the PITF No. 40 is applied are the interest rate swaps that meet specific matching criteria.

• v. Per Share Information — Basic net income per share is computed by dividing net income attributable to common shareholders by the weighted-average number of common shares outstanding for the period.

Cash dividends per share presented in the accompanying consolidated statement of income are dividends applicable to the respective years including dividends to be paid after the end of the year.

oduction Messages from Top Management Value Creation Story Business Strategies Corporate Governance Information

• w. New Accounting Pronouncements — ASBJ Statement No. 34, "Accounting Standard for Leases" and ASBJ Guidance No. 33 "Guidance on Accounting Standard for Leases" were issued on September 13, 2024. As part of the initiatives to make Japanese GAAP consistent with international standards, ASBJ conducted a study based on international accounting standards to develop an accounting standard relating to leases that will have lessees recognize assets and liabilities for all leases, and issued an accounting standard for leases and a guidance. While the basic policy of the standard is based on a single lessee accounting model of IFRS 16, by only adopting the main provisions instead of the whole of IFRS 16, the standard aimed to be simple and highly convenient, basically requiring no modification when applying the provisions of IFRS 16 to non-consolidated financial statements.

For the accounting treatment of lessees, lessees shall adopt the single lessee accounting model as the method to allocate expenses arising from leases as with IFRS 16, under which depreciation on right-of-use assets and interests on lease liabilities for all leases, regardless of a finance lease or an operating lease are recorded.

The standards and guidance will be applied from the beginning of the fiscal year ending March 31, 2028.

The Group is currently in the process of determining the effects of applying the standard and guidance on the consolidated financial statements.

### 3. Significant Accounting Estimates

### Provision for contract loss

(1) Carrying amounts

	Millions	Thousands of U.S. dollars	
	2025	2024	2025
Provision for contract loss	¥8,847	¥8,746	\$59,171

### (2) Information on the significant accounting estimate

Provision for contract loss is provided when it is probable that the total construction costs will exceed total construction revenue and if the outcome of a construction contract can be estimated reliably. The amount of provision for contract loss is calculated as the excess amount (contract loss) deducted by profit or loss already recognized for the construction contract. Variation in the estimated amount of contract loss due to profitability, production, and quality issues that may arise in future may have a material impact on the future consolidated financial statements.

### Goodwill and other intangible assets acquired through business combination

(1) Carrying amounts

	Millions	Thousands of U.S. dollars	
	2025	2024	2025
Goodwill	¥6,563	¥5,971	\$43,894
Software	840		5,621
Other intangible assets	49	1,580	332

### (2) Information on the significant accounting estimate

Goodwill and other intangible assets, such as technology assets, are recognized during the course of business combinations. The Group annually determines whether impairment indicators exist for these assets based on changes in business environment and deteriorated business results. Whenever the circumstance indicates the carrying amount of goodwill and other intangible assets may not be recoverable, undiscounted future cash flows are estimated based on business plans. An impairment loss is recognized if the carrying amount of goodwill and other intangible assets exceeds the sum of the undiscounted future cash flows and the carrying amount of the goodwill and other intangible assets is reduced to its recoverable amount. Impairment tests on goodwill and other intangible assets generated from the business combinations of overseas consolidated subsidiaries are carried out based US GAAP or IFRS. Assumptions such as sales forecast and operating expense forecast based on the plans for unit sales and unit price are included in estimation of future cash flows and any changes in these assumptions due to changes in economic environment and demand trends may have a material impact on the future consolidated financial statements.

### 2025 Yokogawa Report

### 4. Investment Securities

Investment securities as of March 31, 2025 and 2024, consisted of the following:

	Million	U.S. dollars	
	2025	2024	2025
Noncurrent:			
Equity securities	¥41,015	¥43,879	\$274,317

The cost and aggregate fair values of investment securities at March 31, 2025 and 2024, were as follows:

	Millions of yen				
March 31, 2025	Cost	Unrealized gain	Unrealized loss	Fair value	
Securities classified as:					
Available-for-sale:					
Equity securities	¥5,862	¥30,122	¥(16)	¥35,968	
March 31, 2024					
Securities classified as:					
Available-for-sale:					
Equity securities	¥6,006	¥30,316	¥(20)	¥36,302	
	Thousands of U.S. dollars				
March 31, 2025	Cost	Unrealized gain	Unrealized loss	Fair value	
Securities classified as:					
Available-for-sale:					
Equity securities	\$39,210	\$201,461	\$(109)	\$240,562	

The information for available-for-sale securities sold during the years ended March 31, 2025 and 2024, was as follows:

	Millions of yen					
2025	Proceeds	Realized gain	Realized loss			
Available-for-sale:						
Equity securities	¥786	¥635				
Other securities	49	10				
Total	¥835	¥645				
		Millions of yen				
2024	Proceeds	Realized gain	Realized loss			
Available-for-sale:						
Equity securities	¥28,315	¥16,990				
Total	¥28,315	¥16,990				
	Т	Thousands of U.S. dollars				
2025	Proceeds	Realized gain	Realized loss			
Available-for-sale:						
Equity securities	\$5,259	\$4,249				
Other securities	327	68				
Total	\$5,587	\$4,318				

Impairment losses are recognized for available-for-sale securities except for equity securities without market price if declines in fair value are 50% or more. If declines in fair value are 30% to 50%, impairment losses may be recognized for amount deemed to be irrecoverable considering the declines are other than temporary. Impairment losses for equity securities without market price may be recognized for amounts deemed to be irrecoverable if declines in fair value are 50% or more considering the declines are other than temporary.

Loss on valuation of investment securities for the years ended March 31, 2025 and 2024, was  $\pm$ 3,130 million (U.S.\$20,939 thousand) and  $\pm$ 1,041 million, respectively.

### 5. Inventories

Inventories at March 31, 2025 and 2024 consisted of the following:

	Millions	U.S. dollars	
	2025 2024		2025
Merchandise and finished goods	¥20,174	¥21,719	\$134,925
Work in process	5,791	5,857	38,735
Raw materials and supplies	24,962	27,138	166,947
Total	¥50,927	¥54,715	\$340,608

### **6. Expected Loss on Construction Contracts**

The Group recognizes an expected loss on construction contracts when it is probable that total contract costs will exceed total contract revenue. The inventory and the expected loss on construction contracts are not offset, but are separately presented in the consolidated balance sheet.

The balance of inventories relating to the expected loss on construction contracts for the years ended March 31, 2025 and 2024, was as follows:

	Million	Thousands of U.S. dollars		
	2025 2024			
Merchandise and finished goods	¥126	¥75	\$845	
Work in process	157	55	1,055	
Total	¥284	¥131	\$1,900	

### 7. Property, Plant, and Equipment

Accumulated depreciation on property, plant, and equipment as of March 31, 2025 and 2024, was ¥157,778 million (U.S.\$1,055,232 thousand) and ¥162,888 million, respectively.

### 8. Long-lived Assets

The Group reviewed its long-lived assets for impairment as of and for the years ended March 31, 2025 and 2024. As a result, impairment losses of ¥3,987 million (U.S.\$26,670 thousand) and ¥11,473 million were recognized for the years ended March 31, 2025 and 2024, respectively.

The main components of loss on impairment of long-lived assets for the year ended March 31, 2025, were as follows:

			Millions of yen	Thousands of U.S. dollars
Location	Use	Category	Impairm	ent loss
United States	Business assets	Machinery, equipment, and vehicles	¥97	\$653
		Tools, furniture, and fixtures	2	15
		Right-of-use assets	25	169
		Software	0	1
		Goodwill	2,222	14,864
		Other intangible assets	1,480	9,902
Japan	Business assets	Tools, furniture, and fixtures	15	100
		Software	5	39
	Idle assets	Buildings and structures	115	769
		Land	22	153
		Total	¥3,987	\$26,670

The Group's business assets are grouped in accordance with management accounting classification.

The book values of business assets (goodwill and other assets) arising at the time of acquisition of the United States-based subsidiary, Yokogawa Fluence Analytics, Inc., have been reduced to the respective recoverable amount as their business results fell below initially forecasted business plans. The differences between the book values and recoverable amounts have been recorded as impairment losses.

Business assets are measured at their recoverable amounts, which are value in use that is calculated by discounting future cash flows at 10%.

Messages from Top Managemer

Value Creation Story

Business Strategie

The main components of loss on impairment of long-lived assets for the year ended March 31, 2024, were as follows:

			Millions of yen
Location	Use	Category	Impairment loss
United States	Business assets	Tools, furniture, and fixtures	¥38
		Right-of-use assets	103
		Goodwill	3,563
		Other intangible assets	3,701
Germany	Business assets	Goodwill 3	
		Other intangible assets	881
Japan	Business assets	Machinery, equipment, and vehicles	46
		Other intangible assets	1
		Long-term prepaid expenses	4
	Idle assets	Machinery, equipment, and vehicles	28
		Total	¥11,473

The Group's business assets are grouped in accordance with management accounting classification.

The book values of business assets (goodwill and other assets) arising at the time of acquisition of the United States-based subsidiaries, PXiSE Energy Solutions, LLC and Yokogawa Fluence Analytics, Inc., as well as the Germany-based subsidiary, Yokogawa Insilico Biotechnology GmbH, have been reduced to the respective recoverable amount as their business results fell below initially forecasted business plans. The differences between the book values and recoverable amounts have been recorded as impairment losses.

Business assets are measured at their recoverable amounts, which are value in use that is calculated by discounting future cash flows at 10%.

### 9. Short-term Loans, Commercial Papers, Lease Obligations, and Long-term Debt

Short-term bank loans at March 31, 2025 and 2024, included bank overdrafts. The annual average interest rate on the short-term bank loans was 2.565% and 0.019% for the years ended March 31, 2025 and 2024, respectively.

The annual average interest rate on commercial papers was 0.003% for the year ended March 31, 2024.

Long-term debt as of March 31, 2025 and 2024, consisted of the following:

	Millions of yen		U.S. dollars
	2025	2024	2025
Loans from banks and other financial institutions	¥24,043	¥24,000	\$160,804
Lease obligations	9,700	8,589	64,876
Total	33,743	32,589	225,680
Less: Current portion	2,602	2,780	17,405
Long-term debt, less current portion	¥31,141	¥29,808	\$208,274

Annual maturities of long-term loans from banks and other financial institutions at March 31, 2025, were as follows:

Year ending March 31	Millions of yen	Thousands of U.S. dollars
2026	¥17	\$119
2027	24,015	160,614
2028	10	70
2029		
2030 and thereafter		
Total	¥24,043	\$160,804

The annual average interest rates on long-term loans (excluding current portion) from banks were 0.593% for the years ended March 31, 2025 and 2024.

  - (1) Components of plan assets Plan assets:

	2025	2024
Equity investments	5%	2%
Debt investments	8	63
Cash and cash equivalents	73	29
Others	14	6
Total	100%	100%

- (2) Method of determining the expected rate of return on plan assets

  The expected rate of return on plan assets is determined based on the expected long-term rates of return for the various plan asset components.
- (h) Assumptions used for the years ended March 31, 2025 and 2024, were as follows:

	2025	2024
Discount rate	3.25%	4.29%
Expected rate of return on plan assets	1.85%	3.81%

(i) Payments to defined contribution plans amounted to ¥4,443 million (U.S.\$29,715 thousand) and ¥4,058 million for the years ended March 31, 2025 and 2024, respectively.

### 11. Equity

Japanese companies are subject to the Companies Act of Japan (the "Companies Act"). The significant provisions in the Companies Act that affect financial and accounting matters are summarized below:

### (a) Dividends

Under the Companies Act, companies can pay dividends at any time during the fiscal year in addition to the year-end dividend upon the passing of a resolution at the shareholders' meeting. For companies that meet certain criteria such as; (1) having a board of directors, (2) having independent auditors, (3) having an audit and supervisory board, and (4) prescribing a one-year term of service for directors (rather than the conventional two-year term) in its articles of incorporation, the board of directors may declare dividends (except for dividends in kind) at any time during the fiscal year if the company has prescribed so in its articles of incorporation.

Semiannual interim dividends may also be paid once a year upon resolution by the board of directors if the articles of incorporation of the company so stipulates. The Companies Act provides certain limitations on the amounts available for dividends or the purchase of treasury stock. The limitation is defined as the amount available for distribution to the shareholders, but the amount of net assets after dividends must be maintained at no less than ¥3 million.

- (b) Increases/decreases and transfer of common stock, reserve, and surplus

  The Companies Act requires that an amount equal to 10% of dividends must be appropriated as a legal reserve (a component of retained earnings) or as additional paid-in capital (a component of capital surplus) depending on the equity account charged upon the payment of such dividends until the aggregate amount of legal reserve and additional paid-in capital equals 25% of the common stock. Under the Companies Act, the total amount of additional paid-in capital and legal reserve may be reversed without limitation. The Companies Act also provides that common stock, legal reserve, additional paid-in capital, other capital surplus, and retained earnings can be transferred among the accounts under certain conditions upon resolution of the shareholders.
- (c) Treasury stock and treasury stock acquisition rights

  The Companies Act also provides for companies to purchase treasury stock and dispose of such treasury stock by resolution of the board of directors. The amount of treasury stock purchased cannot exceed the amount available for distribution to the shareholders which is determined by a specific formula. Under the Companies Act, stock acquisition rights are presented as a separate component of equity. The Companies Act also provides that companies can purchase both treasury stock acquisition rights and treasury stock. Such treasury stock acquisition rights are presented as a separate component of equity or deducted directly from stock acquisition rights.

### 12. Income Taxes

The tax effects of significant temporary differences and tax loss carry forwards that resulted in deferred tax assets and liabilities at March 31, 2025 and 2024, were as follows:

	Millions	s of yen	Thousands of U.S. dollars
	2025	2024	2025
Deferred tax assets:			
Provision for bonuses	¥3,436	¥3,817	\$22,981

### Thousands of U.S. dollars

	2025						
	One year or less	After one year through two years	After two years through three years	After three years through four years	After four years through five years	After five years	Total
Deferred tax assets relating to tax loss carryforwards*	\$3,549	\$1,561	\$3,452	\$948	\$1,054	\$19,804	\$30,370
Less valuation allowance for tax loss carryforwards	(837)	(64)	(64)	(170)	(276)	(15,174)	(16,589)
Net deferred tax assets relating to tax loss carryforwards	2,711	1,496	3,387	777	777	4,630	13,781

<sup>\*</sup> Deferred tax assets relating to tax loss carryforwards were calculated by applying the normal effective statutory tax rate.

A reconciliation between the normal effective statutory tax rate and the actual effective tax rate reflected in the accompanying consolidated statement of income for the years ended March 31, 2025 and 2024, was as follows:

	2025	2024
Normal effective statutory tax rate	30.6%	30.6%
Inhabitant taxes per capita	0.5	0.2
Permanent difference		
Expenses not deductible for income tax purposes	1.8	0.9
Foreign withholding taxes	1.8	2.4
Loss on impairment of long-lived assets	1.0	2.1
Changes in valuation allowance	2.6	0.5
Lower income tax rates applicable to certain consolidated subsidiaries outside Japan	(8.9)	(8.3)
Equity in earnings of affiliates	(0.8)	(1.1)
Other-net	1.0	(2.6)
Actual effective tax rate	29.7%	24.8%

The Company and certain domestic subsidiaries file their tax returns under the group tax sharing system. The PITF No. 42, "Practical Solution on the Accounting and Disclosure Under the Group Tax Sharing System," issued on August 12, 2021, is applied with regard to accounting treatment and disclosures of national and local taxes and tax effect accounting.

On March 31, 2025, the "Act for Partial Amendment of the Income Tax Act, etc." (Act No. 13 of 2025) were enacted in the Diet session. As a result of the amendment, "Defense Special Corporate Tax" will be levied from the fiscal year beginning on or after April 1, 2026. In relation to the amendment, the statutory tax rate used in calculation of deferred tax assets and deferred tax liabilities on temporary differences that are expected to be reversed from the fiscal year beginning on or after April 1, 2026 has been changed from 30.6% to 31.5%.

The effects of this change on the consolidated financial statements are immaterial.

### 13. Research and Development Costs

Research and development costs were ¥32,061 million (U.S.\$214,431 thousand) and ¥32,435 million for the years ended March 31, 2025 and 2024, respectively, and were included in the cost of sales and selling, general, and administrative expenses in the consolidated statement of income.

### 14. Leases

The Group leases certain tools, furniture, and fixtures; and other assets.

Future minimum lease payments under non-cancelable operating leases as of March 31, 2025 and 2024, are as follows:

	Millions	U.S. dollars			
	2025	2025 2024			
Due within one year	¥993	¥538	\$6,643		
Due after one year	16,844	4,363	112,654		
Total	¥17,837	¥4,902	\$119,297		

Right-of-use assets comprised primarily of building and structures.

### 15. Financial Instruments and Related Disclosures

### (1) Information regarding financial instruments

(a) Group policy on financial instruments

In accordance with the Group's capital expenditure program for the industrial automation and control business and the test and measurement business, the Group uses financial instruments such as bank loans to obtain necessary funding. Cash surpluses are invested in low-risk financial assets. Short-term bank loans are used to fund ongoing operations. Derivatives are used to manage exposure to financial risks as described in Note 16 and are not used for speculative purposes.

(b) Nature of the financial instruments and risk management

Receivables such as trade notes and trade accounts, are exposed to customer credit risk. Those securities are mainly issued by the Group's customers and suppliers, and are managed by regularly monitoring market value and the financial position of the issuers.

Investment securities are exposed to the risk of market price fluctuations. The Group reviews its holdings of these securities, whose issuers are mainly its customers and suppliers, by regularly checking their market value and the financial position of the issuers.

Payment terms of payables such as trade notes and trade accounts, are less than one year.

Long-term debt is used for capital expenditures and investments. In order to manage exposure to market risks from fluctuations in interest rates, the Group principally uses fixed-rate contracts; otherwise, interest rate swap contracts are used for variable rate loans.

Lease obligations are used primarily for capital expenditures and are exposed to liquidity risk at the time of settlement. The Group manages the risk by reviewing funding plan monthly by the group companies.

Foreign currency trade receivables and payables are exposed to market risk resulting from fluctuations in foreign currency exchange rates. Such foreign exchange risk is hedged principally by foreign currency forward contracts.

Basic policies on derivative transactions are set out in the Group's internal guidelines. The guidelines prescribe a control policy, designate authorized departments, specify the purpose of the transactions, define the basis for selecting financial institutions, and specify the reporting route.

The fair value of financial instruments is based on the quoted price in an active market. If a quoted price is not available, other valid valuation techniques are used instead.

### (2) Fair value of financial instruments

The carrying amounts in the consolidated balance sheet, fair value, and unrealized gain (loss) as of March 31, 2025 and 2024, were as detailed below. Equity securities without market price and investments in partnerships are not included.

		Millions of yen

Total	\$225,680	\$223,440	\$(2,240)			
Derivatives (*3)	\$2,115	\$2,115				

- (\*1) Disclosure of cash and cash equivalents, trade notes receivable, accounts receivable, trade notes and accounts payable, electronically recorded obligations-operating, short-term loans payable, payables-other, income taxes payable is omitted since their carrying amounts approximate their fair values because of their short maturities.
- (\*2) Current portion of lease obligations is included.
- (\*3) Assets/liabilities arising from derivative transactions are disclosed as the net amount, and the net payable is shown in parentheses.
- (\*4) Investments in partnerships are not included in the above table in accordance with Paragraph 24-16 of ASBJ Guidance No. 31, "Implementation Guidance on Accounting Standard for Fair Value Measurement," revised on June 17, 2021. The carrying amounts of investments in partnerships were ¥583 million (U.S.\$3,902 thousand) and ¥545 million as of March 31, 2025 and 2024, respectively.

### Notes:

(a) Equity securities without market price as of March 31, 2025 and 2024, are as follows:

		Carrying amount	
	Million	s of yen	Thousands of U.S. dollars
	2025	2024	2025
Equity securities without market price	¥27,737	¥28,767	\$185,512

Equity securities without market price include unlisted equity securities which are not subject to the fair value disclosure in accordance with Paragraph 5 of ASBJ Guidance No. 19, "Implementation Guidance on Disclosures about Fair Value of Financial Instruments," revised on March 31, 2020.

(b) Maturity analysis for financial assets and securities with contractual maturities as of March 31, 2025, is as follows:

	Millions of yen		Thousands of U.S. dollars	
	20	2025		)25
	Due in one year or less	Due after one to five years	Due in one year or less	Due after one to five years
Cash and cash equivalents	¥188,754		\$1,262,400	
Trade notes receivables	11,309		75,640	
Accounts receivable	137,693	¥2,370	920,904	\$15,851
Total	¥337,757	¥2,370	\$2,258,946	\$15,851

- (c) Fair value measurement of financial instruments and breakdown by level of fair values

  Fair values of financial instruments are categorized into following three levels depending on observability and materiality of inputs used for the measurement of fair values.
  - Level 1: Fair values determined based on unadjusted quoted prices in active markets for identical assets or liabilities.
  - Level 2: Fair values determined based on inputs other than quoted market prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
  - Level 3: Fair values determined based on unobservable inputs for the asset or liability.

    If multiple inputs that have significant impact on the fair value measurement are used, the fair value is categorized in the level of the lowest-level input used in the fair value measurement.

### 

Explanation on techniques and inputs used for fair value measurement

### Investment securities:

The fair values of listed equity shares are determined based on quoted market prices and categorized in Level 1 as they are actively traded on stock exchanges.

Long-term debt and lease obligations:

The fair values of long-term debt and lease obligations are determined by discounting cash flows related to the debt at the Group's assumed corporate borrowing rate and categorized in Level 2.

Information

### Derivatives:

The fair values of derivatives are determined by discounting cash flows using observable inputs, including interest rates, foreign exchange rates and others and categorized in Level 2.

### **16. Derivatives**

Derivative transactions are used to manage foreign exchange risk and the risk of market rate fluctuations that occur in the normal course of business. The Group does not use derivatives for speculative purposes or for highly leveraged transactions.

# (1) Derivative transactions to which hedge accounting was not applied at March 31, 2025 and 2024, are as follows:

### Notes:

Sales to customers

- (a) Other revenue represents lease revenues accounted for in accordance with the accounting standards for lease transactions.
- (b) From the year ended March 31, 2025, water business previously included in the Life subsegment has been included in the Energy & sustainability subsegment. 2024 disclosure is presented in accordance with the revised classification.

(c) From the year ended March 31, 2024, industrial automation and control segment has been presented with subsegments of Energy & sustainability, Material, and Life, according to the customers' industries.

Basic information to understand the revenue arising from contracts with customers are disclosed in Note 2, "Summary of Significant Accounting Policies."

The amounts of contract liabilities as of March 31, 2024 and 2023, for which revenue was recognized during the years ended March 31, 2025 and 2024, were ¥42,675 million (U.S.\$285,413 thousand) and ¥39,826 million, respectively.

Contract assets are unbilled receivables for revenues recognized based on the construction progress, mainly under construction contracts. They are reclassified to receivables when the right to the consideration to be received becomes unconditional.

Contract liabilities are primarily advances received from customers in advance of the performance of a contract and are reversed as the performance obligations under the contract are satisfied.

As of March 31, 2025 and 2024, the amounts of revenue expected to be recognized in future for performance obligations, which are fully or partially unsatisfied, were as follows:

	Million	Thousands of U.S. dollars	
	2025	2024	2025
Within one year	¥303,975	¥288,121	\$2,033,006
After one year	123,222	109,339	824,121
Total	¥427,197	¥397,461	\$2,857,127

### 22. Business Combination

Business combination by acquisition

### (1) Outline of the business combination

(a) Name of acquired company and its business outline

Name: BaxEnergy GmbH

Business outline: Provision of renewable energy management solutions

- (b) Major reason for the business combination
  - BaxEnergy GmbH has been providing a proven range of solutions that have already been adopted by major power companies throughout Europe. The acquisition will make these solutions available to global energy asset owners, supported by consultation on implementation and after-sales services through the existing global network of the Company.
- (c) Date of the business combinationMay 29, 2024 (date of share acquisition)June 30, 2024 (deemed date of acquisition)
- (d) Legal form of the business combination Share acquisition in consideration for cash
- (e) Name of the company after the business combination No change
- (f) Ratio of voting rights acquired 100%
- (g) Basis for determining the acquirer

  It is based on the fact that the Company acquired shares in consideration for cash.

# (2) Period for which the acquired company's business results are included in the consolidated financial statements

July 1, 2024, to March 31, 2025

### (3) Details of acquisition cost and consideration by type

Cash consideration of FUR 20 million

### (4) Details and amounts of main acquisition costs

Advisory and other fees: ¥61 million (U.S.\$409 thousand)

### (5) Amount, reason, amortization method, and period of goodwill recognized

- (a) Amount of goodwill recognized ¥4,066 million (U.S.\$27,193 thousand)
- (b) Reason for goodwill recognized

  The future excess earning power expected as a result of business development going forward
- (c) Method and period of amortization Straight-line method over six years

### (6) Details of assets acquired and liabilities assumed at the acquisition date

Year-end cash dividends, ¥29.0 (U.S.\$ 0.19) per share	¥7,506	\$50,206

Business combination by acquisition

### (1) Outline of the business combination

(a) Name of acquired company and its business outline

Name: Web Synergies (S) Pte. Ltd. ("Web Synergies")

Business outline: Provision of digital solutions and services, IT/OT integration, ERP solutions

(b) Major reason for the business combination

For more than a decade, Web Synergies and the Company have successfully collaborated in the provision of solutions and services for internal and external digital transformation (DX), and the Company invested in Web Synergies in October 2021. This acquisition will enable the Company to strengthen its DX-related business for the delivery of cloud services, enterprise data management and integration services, and IT/OT security solutions to its customers.

(c) Date of the business combination May 9, 2025 (date of share acquisition)

- (d) Legal form of the business combination Share acquisition in consideration for cash
- (e) Name of the company after the business combination No change
- (f) Ratio of voting rights after the acquisition
   Ratio of voting rights held by the Company immediately before the acquisition: 15.50%
   Ratio of voting rights additionally acquired on the date of business combination: 63.50%
   Ratio of voting rights after the acquisition: 79.00%
- (g) Basis for determining the acquirer

  It is based on the fact that the Company acquired shares in consideration for cash.

### (2) Details of acquisition cost and consideration by type

Not finalized as of the reporting date

# (3) Details of conditional acquisition cost prescribed in the business combination agreement and accounting policy thereof after the year ended March 31, 2025

- (a) Details of conditional acquisition cost

  Additional payment may be made as the conditional acquisition cost depending on the level of achievement of business results for specified fiscal years.
- (b) Accounting policy after the year ended March 31, 2025 In the event that additional payment of the acquisition cost is made, the acquisition cost shall be revised as if it had been paid at the time of the acquisition, and the amount of goodwill and amortization of goodwill shall be revised.

# (4) Difference between cost of acquisition and total of individual transactions leading to the acquisition

### 24. Segment Information

Under ASBJ Statement No. 17, "Accounting Standard for Segment Information Disclosures," and ASBJ Guidance No. 20, "Guidance on Accounting Standard for Segment Information Disclosures," an entity is required to report financial and descriptive information about its reportable segments. Reportable segments are operating segments or aggregations of operating segments that meet specified criteria. Operating segments are components of an entity about which separate financial information is available and such information is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Generally, segment information is required to be reported on the same basis as is used internally for evaluating operating segment performance and deciding how to allocate resources to operating segments.

### (1) Description of reportable segments

The Group's reportable segments are those for which separate financial information is available and regular evaluation by the Company's management is being performed in order to decide how resources are allocated among the Group. The Group operates in three business segments: industrial automation and control, measuring instruments, and new business and others.

The industrial automation and control business offers comprehensive solutions, including field instruments such as flow meters, differential pressure/pressure transmitters, and process analyzers; control systems and programmable controllers; various types of software to enhance productivity; and services that minimize plant life cycle costs.

The measuring instruments business mainly offers waveform measuring instruments; optical communications measuring instruments; signal generators; and electric voltage, current, and power measuring instruments.

The new business and others mainly offer solution services that provide hardware, software and cloud computing environment for Industrial IoT, etc.

# (2) Accounting methods for each reportable segment's sales, income (loss), assets, and other items

The accounting policies for each reportable segment are consistent with those disclosed in Note 2, "Summary of Significant Accounting Policies."

The aggregate of the income or loss for each reportable segment corresponds to the operating income or loss in the consolidated statement of income.

The assets of a reportable segment consist of trade notes receivable; accounts receivable; contract assets; inventories; property, plant, and equipment; and intangible assets.

### INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of Yokogawa Electric Corporation:

### < Audit of Consolidated Financial Statements>

### Opinion

We have audited the consolidated financial statements of Yokogawa Electric Corporation and its consolidated subsidiaries (the "Group"), which comprise the consolidated balance sheet as of March 31, 2025, and the consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of comprehensive income, consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies, all expressed in Japanese yen.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of March 31, 2025, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with accounting principles generally accepted in Japan.

### Convenience Translation

Our audit also comprehended the translation of Japanese yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made in accordance with the basis stated in Note 1 to the consolidated financial statements. Such U.S. dollar amounts are presented solely for the convenience of readers outside Japan.

### **Basis for Opinion**

We conducted our audit in accordance with auditing standards generally accepted in Japan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the provisions of the Code of Professional Ethics in Japan, and we have fulfilled our other ethical responsibilities as auditors. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Key Audit Matters**

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Deloitte Touche Tohmatsu Limited

### Estimation of the total costs of construction contracts

### Key Audit Matter Description

The Group sells products and provides services related to engineering and maintenance in the Industrial Automation and Control business, which is a core business of the Group. As described in Note 2(p), "Summary of Significant Accounting Policies - Revenue Recognition" to the consolidated financial statements, the Group recognizes revenue based on the progress measured if the progress towards satisfaction of performance obligations for construction contracts related to engineering services can be reasonably measured. Of the total net sales of 562,404 million yen for the year ended March 31, 2025, 260,397 million yen was revenue recognized in accordance with this accounting

In addition, as described in Note 2(I), "Summary of Significant Accounting Policies - Provision for Contract Loss" to the consolidated financial statements, an estimated loss on the contract is provided for as a provision for contract loss when it is probable that the estimated total costs of the construction contract will exceed total construction revenue and the excess amount can be reasonably estimated. Provision for contract loss as of March 31, 2025, was 8,847 million yen.

The progress towards satisfaction of performance obligations, which is used to recognize revenue for certain construction contracts that contain engineering services, is measured on the basis of the percentage of actual costs incurred since the inception of the contract up to the end of the year against the estimated total costs. In addition, the provision for contract loss is calculated by deducting the amount of profit or loss already recognized from the excess, if any, of the total estimated cost of construction over the contract amount. Therefore, the estimation of total costs of construction contracts has a significant impact on both revenue recognition and the calculation of the provision for contract loss.

Some construction contracts are large scale and have a wide scope, and others involve a high degree of complexity, such as those requiring advanced system integration. Therefore, events that were not anticipated at the beginning of the construction may occur during the construction period, and conversion costs, such as labor and subcontracting costs as well as expenses related to the event, could be incurred. In such instances, estimating the total costs of a construction contract may involve a high degree of uncertainty.

### How the Key Audit Matter Was Addressed in the Audit

Our audit procedures related to the estimation of the total costs of construction contracts that may affect both the revenue recognition of construction contracts and the calculation of the provision for contract loss included the following, among others:

(1) Evaluation of internal controls

We tested the design and operating effectiveness of the following controls over the estimation of the total costs of construction contracts:

- Internal controls to monitor the progress of construction with qualitative or quantitative significance on a regular basis in order to keep track of any changes in the status after the commencement of construction and to take corrective measures in a timely manner
- Internal controls to ensure the reasonableness of the estimated total costs of construction contracts at the commencement of construction and to revise such costs in a timely manner in accordance with any changes in circumstances after the commencement of construction
- Internal controls to ensure the completeness of the provision for contract loss for the construction contracts of which the estimated total costs will exceed the total construction revenue
- Evaluation of the reasonableness of the estimated total costs of construction contracts

We obtained the relevant documents related to controls that monitor the progress of construction contracts, selected contracts in which the estimated total costs significantly increased or are expected to increase in the future in comparison with the initial total costs estimated at the commencement of construction, and performed the following procedures for the selected construction contracts:

 We assessed the reasonableness of the assumptions used by the Group by making inquiries of the personnel in charge of monitoring the progress of construction regarding their estimates for additional conversion costs, which are labor and subcontracting costs, and expenses that are required to respond to events that cause a significant increase in total construction costs

Information

Therefore, we determined that the estimation of the total costs of construction contracts that contain engineering services was a key audit matter as it affects both the measurement of the progress towards satisfying performance obligations, which is used to recognize revenue for certain construction contracts, and the calculation of the provision for contract loss.

- · We compared the estimated total costs of construction with the latest construction schedule plan, the cost calculation sheet, and other related documents to evaluate their
- · We compared the estimated total costs of construction at the end of the year with the initial estimated total costs of construction at the commencement of construction or with the estimated total costs after the change if there was a change during the year to evaluate the accuracy of the estimated total costs of construction.

Reasonableness of the estimates of the future cash flows used in the valuation of goodwill and other intangible assets identified in the business combinations

### Key Audit Matter Description

The Group is using M & A as part of its strategic growth investments to expand into new businesses and fields to realize the basic strategy of its medium-term business plan. As a result of multiple M & A transactions, goodwill and other intangible assets (hereinafter referred to as "goodwill and other assets") are recorded in (1) Evaluation of internal controls the Group's consolidated balance sheet. As described in Note 3, "Significant Accounting Estimates" to the consolidated financial statements, the balances as of March 31, 2025, were 6.563 million ven for goodwill and 890 million yen for other intangible assets, respectively.

In addition, as described in Note 8, "Long-lived Assets" to the consolidated financial statements, the Group recorded an impairment loss of 3,987 million yen for the year ended March 31. 2025, as a result of the determination on whether to recognize an impairment loss.

Goodwill and other assets are amortized on a straight-line basis, but if there are any indications of impairment, the Group determines whether an impairment loss should be recognized by comparing the carrying amount with total undiscounted future cash flows from the asset group. If it is determined that an impairment loss is necessary to be recognized, the carrying amount is reduced to the recoverable amount, and the reduction in the carrying amount is recognized as an impairment loss. In addition, for goodwill and other assets arising from business combinations conducted by overseas consolidated subsidiaries, impairment testing is performed in accordance with accounting principles generally accepted in the United States of America or IFRS Accounting Standards.

### How the Key Audit Matter Was Addressed in the Audit

Our audit procedures related to reasonableness of the estimates of the future cash flows used in the valuation of goodwill and other assets identified in the business combinations included the following, among others:

We evaluated the design and operating effectiveness of controls over impairment assessment of fixed assets. The evaluation focused on the development and approval processes of the future business plans as well as the review and approval processes of the significant assumptions included in the business plans.

Examination of the significant assumptions (2)included in the estimates of the future cash flows

To assess the accuracy of future business plans used to estimate the future cash flows and the reasonableness of the significant assumptions applied by management, we inquired of persons in the relevant departments, inspected the meeting minutes of the Board of Directors and Management Board, and performed the following procedures:

Regarding the future business plans, we examined whether previous business plans were achieved. When the Group did not achieve the business plans in past years, we investigated the reason for the variance and considered any effects on the future business The Group identifies each consolidated subsidiary related to goodwill and other assets as an asset group. The Group calculates the recoverable amount used in measuring an impairment loss using the value in use of each asset group, which is calculated by discounting the future cash flows to present value.

The future cash flows used to evaluate goodwill and other assets are estimated based on the future business plans of each consolidated subsidiary and also reflect the fluctuation risk considered by evaluating the magnitude and likelihood of the impact of business risks that may affect the future performance of the subsidiary. In addition, the development of business plans and the assessment of uncertainties focus in particular on significant assumptions such as sales forecasts estimated based on sales volume and sales price plans and operating expenses forecasts.

In this regard, the estimates of these assumptions involve uncertainties being subject to external factors such as future economic environment and demand trends and require advanced judgment by management. As such, we have determined that the reasonableness of the estimates of the future cash flows used in the evaluation of goodwill and other assets identified in the business combinations was a key audit matter.

· For the significant assumptions such as sales and operating expenses forecasts included in the future business plans, we compared them with historical results and performed trend analysis. We examined management's planned measures for their feasibility and consistency with these assumptions. We also compared them with the latest status of orders and contracts and available external data such as reports on market forecasts and examined results of the sensitivity analysis performed by management which considered the fluctuation risk of the significant assumptions in the future.

### Other Information

Management is responsible for the other information. The Audit Committee is responsible for overseeing the Officers and Directors' execution of duties relating to the design and operating effectiveness of the controls over the other information. The other information comprises the information included in the Integrated Report (Yokogawa Report), but does not include the consolidated financial statements and our auditor's report thereon. The Integrated Report (Yokogawa Report) is expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

### Responsibilities of Management and the Audit Committee for the Consolidated Financial

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with accounting principles generally accepted in Japan, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Introduction Messages from Top Management Value Creation Story Business Strategies Corporate Governance Information

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern in accordance with accounting principles generally accepted in Japan and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Officers and Directors' execution of duties relating to the design and operating effectiveness of the controls over the Group's financial reporting process.

### Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with auditing standards generally accepted in Japan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with auditing standards generally accepted in Japan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks. The procedures selected depend on the auditor's judgment. In addition, we obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain, when performing risk assessment procedures, an understanding of internal control relevant to
  the audit in order to design audit procedures that are appropriate in the circumstances, but not for the
  purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate whether the overall presentation and disclosures of the consolidated financial statements are
  in accordance with accounting principles generally accepted in Japan, as well as the overall
  presentation, structure and content of the consolidated financial statements, including the disclosures,
  and whether the consolidated financial statements represent the underlying transactions and events in
  a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial
  information of the entities or business units within the Group as a basis for forming an opinion on the
  group financial statements. We are responsible for the direction, supervision and review of the audit
  work performed for purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with it all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

### <Fee-Related Information>

Fees for audit and other services for the year ended March 31, 2025, which were charged by us and our network firms to Yokogawa Electric Corporation and its subsidiaries were 455 million yen and 49 million year respectively

# **Editorial Policy**

This report is designed to provide shareholders, institutional investors, and other stakeholders with an integrated understanding of Yokogawa Group's efforts to realize a sustainable society and increase corporate value over the medium- to long-term in the context of its value creation story.

In our editorial work, we draw on the International Integrated Reporting Framework advocated by the IFRS Foundation and the Guidance for Collaborative Value Creation (Comprehensive Disclosure and Dialogue Guidance for Collaborative Value Creation) advocated by the Ministry of Economy, Trade and Industry. We are also working to improve and expand our disclosure by incorporating comments received from external evaluation organizations and other sources, as well as feed-back received through dialogue with shareholders and institutional investors. Furthermore, we aim for more integrated disclosure by holding, among other things, joint kick-off and progress meetings between the respective departments responsible for producing this report and the sustainability report.

Yokogawa Group's contributions to realizing a sustainable society and our initiatives for enhancing corporate value.

### ▶Period Covered by the Report

FY2024 (April 1, 2024 to March 31, 2025)
