Reasons for the revision

The distribution of earnings to shareholders is a top management priority for the Company. By achieving growth in earnings, the Company aims to steadily and continuously increase our dividend payments. Specifically, the Company strives to ensure a consolidated dividend payout ratio of more than 30% while giving overall consideration to ensuring investment capital for maximizing business results and mid- to long-term shareholder value and maintaining financial footing for supporting investment for growth. The Company also aims to maintain a stable dividend based on a DOE (dividend on equity) ratio, even when business results deteriorate due to temporary factors.

Based on the above policy, considering the revision of the consolidated business forecast for the year ending March 31, 2026, the Company plans to pay a year-end dividend of 46 yen per share for fiscal year 2025. This is up 14 yen from the 32 yen dividend forecast that was announced on November 4, 2025.

A resolution to this effect will be placed on the agenda for the Company's general shareholders meeting scheduled to be held in June.
